

A.) Using only HTML and CSS, create three (3) personal web pages:

1. resume.html
2. bio.html
3. index.html

**resume.html** should contain the following:

- Full name and contact information
- Education
- Skills (programming languages, etc.)
- Relevant coursework
- Professional experience - for each job list title, responsibilities and accomplishments
- Activities related to your field of study or work

**bio.html** should contain a brief biographical sketch of yourself. This is where you may discuss hobbies, civic organizations and community involvement.

**index.html** is your personal home page. This page should contain links to resume.html and bio.html. Be sure to include some form of navigation to move between pages (i.e. do not rely on the browser's back and forward buttons). This page should contain the following:

- Your name
- A photo of you
- A link to your resume
- A link to your biographical sketch

★ You may only use HTML5 markup and CSS for this assignment.

- No Javascript
- No Server side includes or server side processing

**Due date:**

Completed web pages - Wednesday 21st by midnight

**Assignment submission:**

Upload the files to your public\_html folder on the CS server.

**Assignment evaluation:**

Your HTML and CSS must pass the w3c validators in order to receive full credit.
