

The final presentation should be 25-35 minutes.

Every team member should participate (both in creating the presentation and presenting). The presentation should be included in the project's SDL.

- Title slide - Team member's names, software name
- Team's organization
 - process model (waterfall, agile, etc.)
 - tools
 - training
 - Configuration management plan (CM)
 - Software Quality Assurance plan (SQA)
- Software design
 - Software architecture - High level overview
 - Detail design artifacts for each major part of the architecture (for example model)
- Test overview
 - Overall approach (relate to SQA and CM plan)
 - Unit test activities and results (who tested, how, and when)
 - Integration test activities and results (who tested, how, and when)
- Traceability matrix results
 - a detailed review of the RTVM with results: display the requirement, the component(s) that were designed to satisfy the requirement, and the test results for the component(s)
- Software demo - demonstrate how to use software
- Project recap - Lessons learned
